AGRI-COMPUTERS

TECHNOLOGY TO HELP YOU GROW

The advantage of exact and reliable weight information

Precision instead off the top of your head

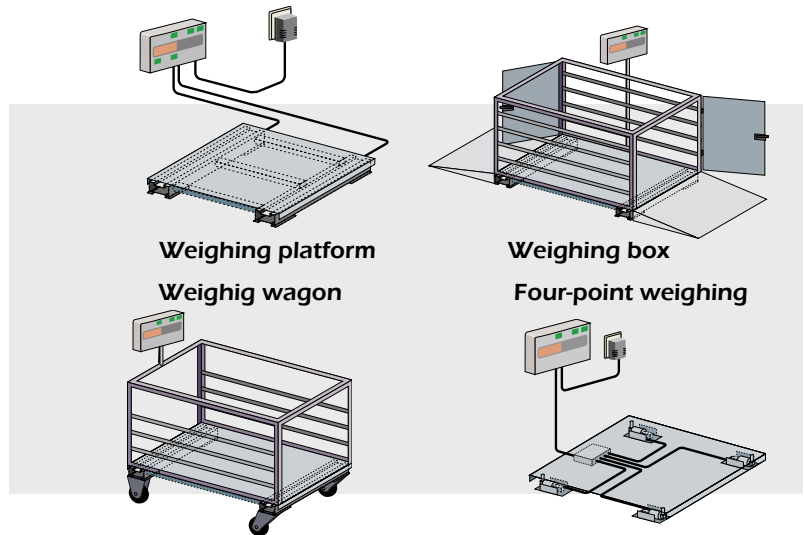

Pig keepers want to know exactly how their farm is running are no longer satisfied with half measures or speculation. With the Fancom weighing system, this time is over for you, for good. This electronic weighing system does it work with extremely reliably. It provides an insight into the growth data of you animals and accurate information about the weight of the supplied and delivered pigs. With Fancom you know exactly how much pork you are dealing with. Whitout guessing!

Fancom gives a clear answer to these questions. By means of the start and final weights, you have control of the right information. You can precisely calculate index numbers, such as growth and feed conversion. It's reliable management information, that enables you to fine-tune your management. The Fancom also allows you to start with uniform groups and to deliver at the most favourable weight.

Efficient and accurate weighing in less time

Fancom proves that weighing does not have tot take u a lot of time. You can very easily install the system at the place that suits you best. In the central corridor or for example at a place where supply and delivery of your pigs take place. Just once over the weigh-bridge and the correct weight of your animals is imediately available. The lock on function guarantees accurate weighing, even with the most restless animals. The unique back light display enables easy red out the wieghts under all circumstances.

Adjusted to your house, adjusted to your budget
